

TEST REPORT

Application No.: SZCR2502000437WM
Applicant: Honor Device Co., Ltd.
Address of Applicant: Suite 3401, Unit A, Building 6, Shum Yip Sky Park, No. 8089, Hongli West Road, Xiangmihu Street, Futian District, Shenzhen, Guangdong 518040, People's Republic of China
Manufacturer: Honor Device Co., Ltd.
Address of Manufacturer: Suite 3401, Unit A, Building 6, Shum Yip Sky Park, No. 8089, Hongli West Road, Xiangmihu Street, Futian District, Shenzhen, Guangdong 518040, People's Republic of China
Equipment Under Test (EUT):
EUT Name: Mobile Phone
Model No.: PTP-N49
Standard(s) : EN 301 549 V3.2.1 (2021-03)
EN 301 549 V4.1.1c (2025-04) - V.0.0.13
Date of Receipt: 2025-02-07
Date of Test: 2025-02-07 to 2025-04-14
Date of Issue: 2025-06-25

Test Result:	Pass*
---------------------	--------------

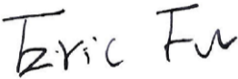

* In the configuration tested, the EUT complied with the standards specified above.

Keny Xu
EMC Laboratory Manager

2 Test Summary

Item	Standard	Method	Result
Generic requirements	EN 301 549 V4.1.1c (2025-04) - V.0.0.13 Clause 5 Generic requirements	EN 301 549 V4.1.1c (2025-04) - V.0.0.13	Pass
ICT supporting real-time bidirectional communication	EN 301 549 V4.1.1c (2025-04) - V.0.0.13 Clause 6 ICT supporting real-time bidirectional communication		Pass
ICT with video capabilities	EN 301 549 V4.1.1c (2025-04) - V.0.0.13 Clause 7 ICT with video capabilities		Pass
Hardware	EN 301 549 V4.1.1c (2025-04) - V.0.0.13 Clause 8 Hardware		Pass
Software	EN 301 549 V4.1.1c (2025-04) - V.0.0.13 Clause 11 Software	EN 301 549 V4.1.1c (2025-04) - V.0.0.13 WCAG 2.2	Pass

Remark:

1. The test content of EN 301 549 V4.1.1c can cover EN 301 549 V3.2.1. Therefore, only all the test cases of EN 301 549 V4.1.1c are listed here to simultaneously prove that the product complies with both the content of EN 301 549 V4.1.1c and EN 301 549 V3.2.1.
2. Web Content Accessibility Guidelines (WCAG): Web Content Accessibility Guidelines (WCAG) 2.1 covers a wide range of recommendations for making Web content more accessible. WCAG 2.2 extends Web Content Accessibility Guidelines 2.1 (WCAG2.1), which was published as a W3C Recommendation June 2018.

Unless otherwise agreed in writing, this document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at <https://www.sgs.com/en/Terms-and-Conditions>. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 30 days only.

4 General Information

4.1 Details of E.U.T.

Description	EUT situation
OS Version	Magic OS 9.0
Android Version	V15
Build number	9.0.0.191(SP72C431E5R4P1log), 9.0.0.x(SPxxC431ExRxPxlog) Note: The x in the version number represents a digit and indicates upward compatibility. Software updates will be released by the manufacturer to fix some bugs or enhance some functions after launch on the market. All versions released by the manufacturer do not introduce changes to accessibility features.
Baseband version	00034,00034
Kernel version	6.6.30-android15-8-g0261dbe3cf7e-a b12786384-4k kleaf@build-host #1 Wed Dec 11 19:16:38 UTC 2024
Product is a fixed device	No
Product has Claiming visual distance	No
Product has screen reading function	Yes
Product has non-web software that supports screen reading function	Yes
The transaction process supports automatic detection of erroneous inputs	Yes
Product has RTT function	Yes
Electronic format product files are provided with the product	No
Product has two-way video communication function	Yes
Operational space/functional range for consumer	The operation and settings of this product are all supported by the device itself.

Remark:

The information in this section is provided by the applicant or manufacturer, SGS is not liable to the accuracy, suitability, reliability or/and integrity of the information.

4.2 Support Unit

Equipment	Manufacturer	Model No.
Bluetooth Keyboard	Logitech	K865
Bluetooth Mouse	Logitech	M650M

Unless otherwise agreed in writing, this document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at <https://www.sgs.com/en/Terms-and-Conditions>. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 30 days only.

4.3 Measurement Uncertainty

Test Item	Measurement Uncertainty
Coverage Factor k = 2, when measurement result is $\geq 1\text{cd/m}^2$	$\pm 3.47\%$
Coverage Factor k = 2, when measurement result is $< 1\text{cd/m}^2$	$\pm 4.45\%$
Colour unit (CIE 1976)	± 0.003
PULSE Analysis system	0.2dB
Acoustic Calibrator	0.1dB
Anechoic Chamber	0.6dB
Low Noise Microphone	0.24dB
Steel Ruler	0.9mm

Remark:
 The U_{lab} (lab Uncertainty) is less than $U_{\text{CISPR/ETSI}}$ (CISPR/ETSI Uncertainty), so the test results
 – compliance is deemed to occur if no measured disturbance level exceeds the disturbance limit;
 – non-compliance is deemed to occur if any measured disturbance level exceeds the disturbance limit.

4.4 Test Location

All tests except for the RTT tests of clause 6 were performed at:

SGS-CSTC Standards Technical Services Co., Ltd., Shenzhen Branch

No. 1 Workshop, M-10, Middle Section, Science & Technology Park, Nanshan District, Shenzhen, Guangdong, China. 518057.

Tel: +86 755 2601 2053 Fax: +86 755 2671 0594

RTT tests of clause 6 were sub-contracted:

Fabryczna 11/203, 31-553 Kraków Poland

Tel: +48 45 325 56 15

Stresemannstraße 47 40210 Dusseldorf

Tel: 015206530881

Unless otherwise agreed in writing, this document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at <https://www.sgs.com/en/Terms-and-Conditions>. 4.5 Test Facility

The test facility is recognized, certified, or accredited by the following organizations:

• **A2LA (Certificate No. 3816.01)**

SGS-CSTC Standards Technical Services Co., Ltd., Shenzhen EMC Laboratory is accredited by the American Association for Laboratory Accreditation(A2LA). Certificate No. 3816.01.

• **VCCI (Member No. 1937)**

The 3m Fully-anechoic chamber for above 1GHz, 10m Semi-anechoic chamber for below 1GHz, Shielded Room for Mains Port Conducted Interference Measurement and Telecommunication Port Conducted Interference Measurement of SGS-CSTC Standards Technical Services Co., Ltd. Shenzhen EMC laboratory have been registered in accordance with the Regulations for Voluntary Control Measures with Registration No.: G-20026, R-14188, C-12383 and T-11153 respectively.

• **FCC –Designation Number: CN1336**

SGS-CSTC Standards Technical Services Co., Ltd., Shenzhen EMC Laboratory has been recognized as an accredited testing laboratory.

Designation Number: CN1336. Test Firm Registration Number: 787754.

• **Innovation, Science and Economic Development Canada**

SGS-CSTC Standards Technical Services Co., Ltd., Shenzhen EMC Laboratory has been recognized by ISED as an accredited testing laboratory.

CAB identifier: CN0006.

IC#: 4620C.

4.6 Deviation from Standards

None

4.7 Abnormalities from Standard Conditions

None

5 Equipment List

Equipment	Manufacturer	Model No.	Inventory No.	Cal Date	Cal Due Date
PULSE Analysis system	B&K	3160-A-042	SZE029-2-2	2024-10-09	2025-10-08

6 Test Results

6.1 Generic Requirements

Applies to EN 301 549 Criteria			
Test Item		Procedure	Result
Clause 5.1 Closed functionality			
5.1.2 General	5.1.2.2 Assistive technology	<ol style="list-style-type: none"> Determine the functionality of the ICT that is closed. Check that the tests C.5.1.3 to C.5.1.6 can be carried out without the attachment or installation of any assistive technology except personal headsets or inductive loops. 	Pass
5.1.3 Non-visual access	5.1.3.1 Audio output of visual information	<ol style="list-style-type: none"> Determine the functionality of the ICT that is closed. Check that they are all operable using audio output access. 	Pass
	5.1.3.2 Auditory output delivery including speech	<ol style="list-style-type: none"> Check that the auditory output is delivered by a mechanism included in or provided with the ICT. Check that the auditory output is delivered by a personal headset that can be connected through a 3,5 mm audio jack without requiring the use of vision. 	Pass
	5.1.3.4 Speech output user control	<ol style="list-style-type: none"> Check that the speech output is capable of being interrupted when requested by the user. Check that the speech output is capable of being repeated when requested by the user. 	Pass
	5.1.3.5 Speech output automatic interruption	<ol style="list-style-type: none"> Determine the closed functions of the ICT. Check that the speech output for each single function is interrupted on a user action. Check that the speech output for each single function is interrupted when new speech output begins. 	Pass
	5.1.3.6 Speech output for non-text content	<ol style="list-style-type: none"> Check that speech output is provided as an alternative for non-text content. Check that the non-text content is not pure decoration. Check that the non-text content is not used only for visual formatting. Check that the speech output follows the guidance for "text alternative" described in WCAG 2.2 Success Criterion 1.1.1. 	Pass
	5.1.3.7 Speech output for video information	<ol style="list-style-type: none"> Check that the speech output presents equivalent information for the pre-recorded video content. 	Not applicable

Attention: To check the authenticity of testing /inspection report & certificate, please contact us at telephone: (86-755) 8307 1443, or email: CN.Doccheck@sgs.com

	5.1.3.8 Masked entry	1. Check that the auditory output is not a spoken version of the characters entered. 2. Check that the auditory output is known to be delivered only to a mechanism for private listening.	Pass
	5.1.3.9 Private access to personal data	1. Check that the auditory output is only delivered through a mechanism for private listening. 2. Check that the mechanism for private listening can be connected without requiring the use of vision. 3. Check that the auditory output is delivered through all user-selectable mechanisms.	Pass
	5.1.3.10 Non-interfering audio output	1. Check that the interfering audible output lasts no longer than three seconds.	Not applicable
	5.1.3.11 Private listening volume	1. Check that there is at least one non-visual mode of operation for controlling the volume.	Pass
	5.1.3.12 Speaker volume	1. Check that a non-visual incremental volume control is provided. 2. Check that output amplification up to a level of at least 65 dBA (-29 dBPaA) is available.	Pass
	5.1.3.13 Volume reset	1. Check that a function is provided to automatically reset the volume to be at a level of 65 dBA or less after every use.	Not applicable
	5.1.3.14 Spoken languages	1. Check that the speech output is in the same human language of the displayed content provided.	Pass
	5.1.3.15 Non-visual error identification	1. Check that speech output identifies the item that is in error. 2. Check that the speech output describes the item that is in error.	Pass
	5.1.3.16 Receipts, tickets and transactional outputs	1. Check that speech output is provided which includes, all information necessary to complete or verify the transaction.	Pass
5.1.4 Functionality closed to text enlargement		1. Measure the height of a capital letter H. 2. Check that it subtends an angle of at least 0,7 degrees at the specified viewing distance.	Not applicable
5.1.5 Visual output for auditory information		1. Check that the visual information is equivalent to the pre-recorded auditory output.	Pass
5.1.6 Operation without keyboard interface	5.1.6.1 Closed functionality	1. Check that all functionality is operable without vision.	Not applicable
	5.1.6.2 Input focus	1. Check that it is possible to move the input focus away from that element using the same mechanism.	Not applicable
5.1.7 Access without speech		1. Check that the closed functions can be enabled by an alternative input mechanism that does not require speech.	Pass

5.1.8 Identify input purpose (closed functionality)	1.For each input field that collects information about a user check that it serves a purpose identified in the Input Purposes for User Interface Components section of WCAG 2.2. 2.Check that there is auditory output that conforms to clause 5.1.3.2. 3.Check that the auditory output describes the input purpose.	Pass	
Clause 5.2 Activation of accessibility features			
5.2 Activation of accessibility features	1. Check that it is possible to activate those accessibility features without relying on a method that does not support that need.	Pass	
Clause 5.3 Biometrics			
5.3 Biometrics	Testing 1	1.Check that means can be used for user identification.	Pass
	Testing 2	1. Check that another means can be used for control of ICT.	Pass
Clause 5.4 Preservation of accessibility information during conversion			
5.4 Preservation of accessibility information during conversion	1. Check that the non-proprietary information provided for accessibility is preserved when the ICT converts information or communication.	Not applicable	
Clause 5.5 Control using tactilely discernible operable parts			
5.5 Control using tactilely discernible operable parts	1. Check that there is a mode of operation that allows all the functionality of the ICT that requires manual operation and control to be controlled without requiring vision using only tactilely discernible operable parts.	Pass	
Clause 5.6 Locking or toggle controls			
5.6.1 Tactile or auditory status	1. Check that there is at least one mode of operation where the status of all locking or toggle controls can be determined through touch without operating the control. 2. Check that there is at least one mode of operation where the status of all locking or toggle controls can be determined through sound without operating the control.	Pass	
5.6.2 Visual status	1. Check that there is at least one mode of operation where the status of all locking or toggle controls can be visually determined when the control is presented.	Pass

6.2 ICT supporting continuous bidirectional communication

Applies to EN 301 549 Criteria		
Test Item	Procedure	Result
Clause 6.1 Audio bandwidth for voice communication		
6.1 Audio bandwidth for voice communication	1. Check that the ICT can encode and decode audio with a frequency range with an upper limit of at least 7 000 Hz.	Pass ¹⁾
Clause 6.2 Real-Time Text (RTT)		
6.2.1.1 RTT Functionality	1. A communication session is established between two communication clients. (for emergency communication the PSAP is considered as communication client 2 in this test) 2. Text is entered into communication client 1 in a steady flow without pauses for 10 seconds without send or return. 3. Check that the text received by Communication client 2 is presented without any pause longer than 1 second. 4. Text is entered into the communication client 2 in a steady flow without pauses for 10 seconds without send or return. 5. Check that the text received by communication client 1 is presented without any pause longer than 1 second.	Pass
6.2.1.2 Concurrent voice and text	1. Initiation: A communication session is established from communication client 1 to communication client 2 (and a communication client 3 if multiparty voice communication is supported) (for emergency communication the PSAP is considered as communication client 2 in this test). 2. C1 Activates RTT: Communication client 1 turns on RTT if not on by default. 3. 10 seconds typing out: Text is entered on Communication client 1 in a -steady human-like flow continuously for 10 seconds without any return or send key, while the communicator is also speaking the text aloud. (If multiparty then communication client 3 should speak instead.) 4. Check that while the text is entered on communication client 1 characters appears on communication client 2. 5. Check that the communicator could be clearly heard simultaneous with text appearing. 6. 10 seconds typing back: Text is entered on Communication client 2 in a steady human-like	Pass

Check that the communicator could be clearly heard simultaneous with text appearing.</p>	
<p>6.2.1.3 Single-user operations</p>	<p>1. Initiation: A communication session is established from communication client 1 to communication client 2 including a request to get RTT all available media included in the communication (for emergency communication the PSAP is considered as communication client 2 in this test).</p> <p>2. add a communication client 3 to the communication also with RTT, and also video if video is supported by the ICT, and if multiparty voice communication is supported.</p> <p>3. Check that all requested media were activated by the same single user operation.</p> <p>4. Check that all media requested and supported by communication client 3 was activated by the same single user operation.</p> <p>5. Disconnect the communication from communication client device 1.</p> <p>6. Check that all enabled media were disconnected by the same single user operation.</p> <p>7. Call back from communication client device 2 to communication client device 1.</p> <p>8. Check: that the call back is received and can be answered and that the same media as were provided in the initial communication are provided.</p>	<p>Pass</p>
<p>6.2.2.1 Distinguishable display</p>	<p>1. Initiation: A communication session is established from communication client device 1 to communication clients 2 (and a communication client 3 if multiparty voice communication is supported) (for emergency communication the PSAP is considered as communication client 2 in this test).</p> <p>2. C1 Activates RTT: Communication client 1 turns on RTT if not on be default.</p> <p>3. 10 seconds typing out: Text is entered into communication client 1 in a steady human-like flow continuously for 10 seconds without any return or send key.</p> <p>4. 10 seconds typing back: Text is entered into</p>	<p>Pass</p>

	<p>communication client 2 in a steady human-like flow continuously for 10 seconds without any return or send key.</p> <p>5.(If multiparty – text should also be entered into Communication client 3.)</p> <p>6.Check that all text streams are separate from each other and the source is indicated.</p> <p>7.All parties generate a send or return and enter text for 5 seconds.</p> <p>8.Check that all past utterances and current text streams are separate from each other and the source is indicated.</p>	
6.2.2.2 Active communicator indication	<p>1. Initiation: A communication session is established from communication client 1 to communication clients 2 (If multiparty – a communication client 3 should also be included)(for emergency communication the PSAP is considered as communication client 2 in this test).</p> <p>2. C1 Activates RTT: Communication client 1 turns on RTT if not on be default.</p> <p>3. C2 Speaks: text and speech are sent from communication client 2 intermittently both separately and simultaneously.</p> <p>4. C3 Speaks: If multiparty speech is supported then C3 should take turns sending speech as well).</p> <p>5.Check that any time that C2 or C3 are speaking there is an indication of audio activity on the line.</p>	Pass
6.2.2.3 Indicator of audio with RTT	<p>1.Initiation: A communication session is established from communication client 1 to communication client 2 (If multiparty – a communication client 3 should also be included)(for emergency communication the PSAP is considered as communication client 2 in this test).</p> <p>2.C1 Activates RTT: Communication client 1 turns on RTT if not on by default.</p> <p>3.C2 Speaks: text and speech are sent from communication client 2 intermittently both separately and simultaneously.</p> <p>4.C3 Speaks: If multiparty speech is supported then C3 should take turns sending speech as well).</p> <p>5.Check that any time that C2 or C3 are speaking there is a visual indication of audio activity on the line.</p>	Pass
6.2.2.4 Presentation of relative time order	<p>1.Initiation: A communication session is</p>	Pass

Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 30 days only.

	<p>established from communication client device C1 to communication client C2 including RTT (and a communication client C3 if multiparty voice communication is supported)(for emergency communication the PSAP is considered as communication client 2 in this test)</p> <p>2.Text is entered on the Communication clients simultaneously in natural human communication style with occasional commas, full stops and returns or new line keys for 30 seconds.</p> <p>3. Check that the sent and received text are displayed collected in readable blocks and positioned separated so that a relative order can be perceived.</p> <p>4. Each communication client sends text again simultaneously for 10 characters or more and a return or new line key is hit first on C1 and later on C2 and typing continues for a few seconds on the clients.</p> <p>5. Check that on C1 the order of the entered new lines is visually indicated to be earlier from C1 than from C2 (and C3).</p>	
<p>6.2.2.5 Review of RTT communication contents</p>	<p>1. Initiation: A communication session is established from communication client device C1 to communication client(s) C2 (and a communication client C3 if multiparty voice communication is supported). (for emergency communication the PSAP is considered as communication client 2 in this test)</p> <p>2. C1 Activates RTT: Communication client C1 turns on RTT if not on by default.</p> <p>3. Text sent from all clients until scroll: Text is entered real-timely on Communication clients C1 and C2 typing real sentences and sometimes pressing Enter or Return until the text on C1 scrolls. (If multiparty – a communication client C3 should included and be typing too).</p> <p>4. C2 Continue typing while C1 views: Once enough text is sent to cause the display to scroll on C1, C2 (can C3 if one is involved) continues to send text while C1 makes user interface actions needed to view what has been scrolled off screen (usually a page-up request or some other command for scroll back).</p> <p>5. Check that C1 can view text that has been scrolled off screen and with the approximate time order presented.</p> <p>6. Check that the presentation view of earlier text is stable even as new text arrives.</p>	<p>Pass</p>

	<p>7. Restart typing: Type a sentence on C1.</p> <p>8. Check that the display on C1 changes to show the latest received text as well as the latest text sent, and that real-time presentation of new incoming text is re-gained.</p> <p>9. End communication session: Terminate the current communication.</p> <p>10. Check that the RTT text communication in the latest session can be reviewed after the communication is terminated.</p>	
<p>6.2.3 DTMF touch-tone generation during RTT operations</p>	<p>1. Initiation: A communication session is established from communication client 1 to communication client 2 (for emergency communication the PSAP is considered as communication client 2 in this test)</p> <p>2. C1 Activates RTT: Communication client 1 turns on RTT if not on by default</p> <p>3. C2 next to decoder: Communication client 2's speaker is put next to microphone on device running touchtone decoder app.</p> <p>4. Tones sent: Touch-Tones are sent from C1 while in RTT mode.</p> <p>5. Text is entered on Communication client 1 in a steady human-like flow continuously for 10 seconds without any return or send key, while the communicator is also speaking the text aloud. (If multiparty then communication client 3 should speak instead.)</p> <p>6. Check That the tones are successfully sent and received on Communication client 2 with enough clarity to properly decode them.</p>	<p>Pass</p>
<p>6.2.4 RTT responsiveness</p>	<p>OPTION 1 – Preferred Testing Method</p> <p>1. Setup: Arrange test equipment to measure the time between when a key is pressed and when the character is transmitted from the device.</p> <p>NOTE: In case of encrypted communication, it may be sufficient to observe when the first packet likely containing the character is sent.</p> <p>2. Initiate call: A communication session is established from communication client 1 to communication client 2.</p> <p>3. 5 seconds typing: Text is entered on Communication client 1 in a steady humanlike flow for 5 seconds to ensure RTT is working.</p> <p>4. 5 seconds pause: Wait 5 seconds to make it easy to identify the first packet containing the character entered in step 5.</p> <p>5. Type 1 character: Enter one character on</p>	<p>Pass</p>

Clause 11.2 Operable			
11.2.1 Keyboard accessible	11.2.1.1 Keyboard	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.1.1 Keyboard.	Pass
	11.2.1.2 No keyboard trap	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.1.2 No Keyboard Trap.	Pass
	11.2.1.4 Character key shortcuts	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.1.4 Character Key Shortcuts.	Not applicable
11.2.2 Enough time	11.2.2.1 Timing adjustable	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.2.1 Timing Adjustable.	Pass
	11.2.2.2 Pause, stop, hide	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.2.2 Pause, Stop, Hide.	Pass
11.2.3 Seizures and physical reactions	11.2.3.1 Three flashes or below threshold	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.3.1 Three Flashes or Below Threshold.	Pass
11.2.4 Navigable	11.2.4.3 Focus order	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.4.3 Focus Order.	Pass
	11.2.4.4 Link purpose (in context)	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.4.4 Link Purpose (In Context).	Pass
	11.2.4.6 Headings and labels	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.4.6 Headings and Labels.	Pass
	11.2.4.7 Focus visible	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.4.7 Focus Visible.	Pass
	11.2.4.11 Focus not obscured (minimum)	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.4.11 Focus not obscured (minimum).	Pass
11.2.5 Input modalities	11.2.5.1 Pointer gestures	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.5.1 Pointer Gestures.	Pass
	11.2.5.2 Pointer cancellation	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.5.2 Pointer Cancellation.	Pass
	11.2.5.3 Label in name	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.5.3 Label in Name.	Pass
	11.2.5.4 Motion actuation	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.5.4 Motion Actuation.	Pass
	11.2.5.7 Dragging movements	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.5.7 Dragging movements.	Pass
	11.2.5.8 Target size (minimum)	1. Check that the software does not fail WCAG 2.2 Success Criterion 2.5.8 Target size (minimum).	Pass
Clause 11.3 Understandable			
11.3.1 Readable	11.3.1.1 Language of software	1. Check that the software does not fail WCAG 2.2 Success Criterion 3.1.1 Language of software.	Pass
11.3.2 Predictable	11.3.2.1 On focus	1. Check that the software does not fail WCAG 2.2 Success Criterion 3.2.1 On Focus.	Pass
	11.3.2.2 On input	1. Check that the software does not fail WCAG 2.2 Success Criterion 3.2.2 On Input.	Pass
	11.3.2.4 Consistent	1. Check that components that have the same	Pass

11.4.1 Compatible	11.4.1.2 Name, role, value	1. Check that the software does not fail WCAG 2.2 Success Criterion 4.1.2 Name, Role, Value.	Pass
	11.4.1.3 Status messages	1. Check that the software does not fail WCAG 2.2 Success Criterion 4.1.3 Status messages.	Pass
Clause 11.5 Interoperability with assistive technology			
11.5.1 Closed functionality		1. Check that the closed functionality conforms to clause 5.1.	Pass
11.5.2 Accessibility services	11.5.2.1 Platform interoperability with assistive technologies	1. Check that the platform provides a set of documented platform accessibility. 2. For each user interface concept corresponding to the clauses 11.5.2.5 to 11.5.2.17 supported within the platform software. 2.1 Check that the platform software documentation includes information about platform services that enable assistive technology to interoperate with software running on the platform.	Pass
	11.5.2.3 Use of accessibility services (recommendation)	Clause 11.5.2.3 is informative only and contains no testable requirements.	Pass
	11.5.2.4 Assistive technology	1. Check that the assistive technology uses the documented platform accessibility services.	Pass
	11.5.2.5 Object information	Using an appropriate accessibility inspection tool for platforms: 1. Check that the user interface element's role is programmatically determinable. 2. Check that the user interface element's state(s) is programmatically determinable.	Pass
